## COMPUTERS

Children worked on shapes, they created different shapes using TUX-paint. Children enjoyed moral stories. They played games to colour the objects.

## Amazing facts

Dolphins do not use their 100 teeth for eating, rather for catching the fish which they then just swallow whole.

### ENVIRONMENTAL SCIENCE

**Vegetables:-**Children learnt about the different vegetables. They were taught with the help of pictures as brinjal is purple, potato is brown, peas are green and recognized the vegetables from book.

**Flowers:-**Children were taught about different flowers. They were taught with the help of pictures like marigold, sunflower are yellow, rose is red and lotus is pink. They were able to recognize flowers from books.

**Domestic animals:-** Children were taught about different domestic animals through masks of animals. They were taught that how these animals are helpful for us and what they give us like cow, buffalo and goat give us milk, sheep gives us wool and horse is used for riding and in horse cart. They were able to recognize the picture of animals from books.

**Parts of body:-** They were also taught about sense organs and different body parts through mirror activity. They were able to recognize the picture of different body parts from books and were able to tell the sense organs.

### Conceptual skills

Children learnt about the things that are sweet, summer season, winter season, concept of far and near, concept of fat and thin. Children learnt to hold the books in a proper way. They were also taught to keep themselves clean by showing a video. Concept of far and near was clarified through an activity.

E.g .Two students acted to stand far and near to each other.
